SUMMARY

Global Network Transformation Leader (20+ Years) | SD-WAN & Data Center Architecture | Telecom Infrastructure Resilience & Secure Hybrid Network Design Architect

Senior Network Architect with extensive experience leading global-scale network modernization programs for telecom operators and multinational enterprises. Specializes in designing secure, scalable, and high-availability network architectures across data centers, cloud, and hybrid environments. Proven track record in directing network transformation initiatives, SD-WAN strategy, and service delivery operations supporting mission-critical communication infrastructures across multiple regions. Recognized for driving operational excellence, building high-performing teams, and enabling secure digital connectivity at national and enterprise scale.

CORE EXPERTISE

- **Networking Architecture & Protocols:** BGP, OSPF, MPLS, VXLAN, IPSec, QoS, Traffic Engineering across global WAN backbones
- **SD-WAN & Data Center:** Versa SD-WAN Strategy & Deployment (200+ Sites), Cisco ACI Spine-Leaf Fabric, Hybrid On-Prem/Cloud Connectivity
- **Hardware & Infrastructure Systems:** Cisco Catalyst 9300/3850, Nexus 5K/7K/9K, ISR 4K, High-Availability DC Network Design & Lifecycle Governance
- **Application Delivery & Security:** F5 LTM/GTM, Cisco ISE, DNAC, Zero-Trust Access Policies, Enterprise Secure VPN & Remote Access Architecture
- **Network Operations & Tooling:** Zabbix, NIMSOFT, SolarWinds, Infoblox DDI, Riverbed WAN Optimization, SLA/Latency/Performance Analytics
- **Leadership & Delivery:** Global Team Leadership (30+ Engineers and Managers), Cross-Functional Program Delivery, Cost & Capacity Optimization, L3 Escalation Authority

WORK EXPERIENCE

Tata Communications Ltd

Apr 2025 - Present

Deputy General Manager – Global Operations & Information Technology

Chennai, India

Provides executive leadership for global network architecture strategy, transformation programs, and large-scale service delivery across Tata Communications' enterprise and carrier-grade infrastructure portfolio.

- **Global SD-WAN Architecture Governance:** Leads and mentors a multidisciplinary team of 27 senior network architects, engineers, and operation leaders across WAN, SD-WAN, data centre, and security domains.
- **Enterprise Network Transformation:** Owns architectural governance for global modernization initiatives including SD-WAN deployments, hybrid cloud interconnect frameworks, and multi-region data centre fabrics.
- **Carrier-Grade Architecture Strategy:** Defines standards and design assurance for **MPLS, BGP, VXLAN, IPSec**, and Zero-Trust network architectures supporting large-scale enterprise and telecom workloads.
- **Executive Stakeholder Engagement:** Partners with senior leadership to align network transformation programs with business growth, security posture, operational resilience, and cost optimization strategies.
- **Operational Excellence Leadership:** Worked with CIO-level leadership to align network architecture roadmaps with enterprise resilience and digital transformation strategy.

Tata Communications Ltd

2016 - 2025

Senior Manager – Global Network Architecture & Service Delivery

Chennai, India

Leads enterprise-wide network transformation and operational governance across multi-region data centers and distributed WAN environments. Manages a global engineering team (30+), delivering secure, reliable, and scalable network services supporting critical business operations.

- **Global SD-WAN Modernization:** Directed a multi-phase SD-WAN rollout across 200+ enterprise and service-provider sites, improving latency by ~35% and enabling secure hybrid connectivity.
- **Data Center Fabric Uplift:** Led migration to **Cisco ACI spine-leaf** architecture, increasing east-west throughput efficiency and improving change safety through policy-based segmentation.
- **F5 & Edge Security Enhancements:** Overhauled application delivery stack using **F5 LTM/GTM** to stabilize traffic flows during

peak transaction periods and enhance application resilience.

- **Network Reliability Governance:** Built proactive monitoring + incident playbooks using **Zabbix/NIMSOFT/Riverbed**, reducing mean time to restore (MTTR) by 28%.
- **Leadership & Talent:** Developed technical leadership pipeline, mentoring senior engineers into architecture and escalation roles.

Tata Communications Ltd

2011 - 2016

Manager – Network Engineering & Service Transition

Chennai, India

Owned delivery of large-scale network upgrade programs across MPLS WANs, data centers, and enterprise communication environments.

- **Enterprise WAN Builds:** Designed & implemented multi-region WAN topologies supporting global enterprise clients, improving network stability during high-load operational cycles.
- **Cloud & Hybrid Integration:** Supported early adoption of hybrid-cloud routing frameworks, improving cross-site data flow performance and reliability.
- **Operational Runbooks:** Formalized SOPs, change workflows, and rollback frameworks — directly improving SLA adherence and reducing outage impact windows.
- **L3 Escalation Lead:** Acted as highest technical escalation authority during critical incidents affecting global service clusters.

Tata Consultancy Services

2007 - 2010

Assistant Systems Technician (AST)

New Jersey, USA

Supported high-availability enterprise WAN and data-centre environments, coordinating with global engineering teams to maintain resilient, secure, and performance-optimized network operations across regions.

- **U.S Operations Support:** Seconded to U.S. operations under intra-company transfer (L1) to provide on-site technical coordination and knowledge transfer for enterprise WAN and data-centre projects.
- **Wireless Networks Exposure:** Assisted in **Cisco Wireless LAN Controller (WLC)** based deployments, **AP provisioning**, RF tuning & **site survey heatmap reviews** (via Ekahau/AirMagnet style tooling).
- **Cross-Team Coordination (US Onsite):** Worked onsite with engineering leads and customers to facilitate cutovers, acceptance testing, and operational readiness plans.
- **Incident Response & Escalations:** Handled L2/L3 escalations for WAN performance, QoS prioritization and redundancy failover scenarios across multi-region networks.
- **Firewall & VPN Operations:** Supported **Cisco ASA** rule updates, SSL/IPSec VPN user provisioning, and secure remote access troubleshooting.

CMC Ltd

1997 - 2007

Technical Support | GTE

Hyderabad, India

Supported enterprise and public-sector network environments within a multi-client managed services delivery model, contributing to LAN/WAN deployments, network stability, and secure connectivity operations.

- **LAN/WAN Deployment Support:** Assisted in implementing campus and branch networks, including switch configuration, VLAN segmentation, routing basics, and link redundancy testing.
- **Wi-Fi Network Setup:** Supported wireless AP provisioning, SSID setup, basic RF validation checks, and post-deployment performance tuning for office and campus networks.
- **Firewall & Secure Access Operations:** Performed routine firewall policy updates (Cisco/Fortinet), VPN user configuration, and remote access troubleshooting to maintain secure connectivity.
- **Multi-Vendor Environment Exposure:** Worked across Cisco Catalyst switches, HP/Aruba edge devices, and entry-level firewall platforms commonly used in enterprise branch environments.
- **Client-Facing Support (MSP Model):** Provided support to multiple customers under SLA-driven service commitments, coordinating issue resolution with vendors and field teams.

EDUCATION

BITS Pilani

Master of Science, Software Systems

Pilani, India

Andhra University

Bachelor of Engineering, Electronics and Communications Engineering

Vishakapatnam, India

CERTIFICATIONS

- Cisco Certified Network Professional (CCNP) – Data Center
- Cisco Enterprise Infrastructure Specialist
- Versa SDWAN Certification and ITIL V3/V4 Certified
